

Week 52

This third guipure edging is again a design of Christa van Schagen. In this edging a pair comes out of a plait, makes a 3-pairs crossing with another plait and returns to the original plait again. 13 pairs of bobbins are needed with Altin Basak nr. 50 or similar.

The trick of course is to keep the opening beside the plait between the pair outgoing en incoming as narrow as possible. You have to tense very well and perhaps make the plait for a short while in the direction of the incoming pair.

We wish you again a lot of fun making this edging.
Also we wish you a Merry Christmas with lots of time to make lace.
